Summary

Exceptional Frontend Developer, experienced in developing web applications. I've honed my skills in clean code, maintainability, security, and performance. My journey has led me through diverse roles, from leading teams to conducting usability tests and managing project executions.

Experience

Bivindi | Douala littoral (Remote)
Software Engineering intern - Project:Weather Dashboard App | 01/2023 - 05/2023

• Led the development of a weather dashboard application that provides real-time weather information worldwide. Collaborated with a small team to create a user-friendly frontend interface.
• API Integration: Integrated multiple weather data APIs, allowing users to search and view weather conditions and historical data for any location.
• Data Caching: Implemented client-side data caching to reduce API calls, improving application performance and responsiveness.

TEC-Labs | Yaoundé Centre (Remote)
Frontend Developer - Project: Real-Time Task Management App | 08/2022 - 12/2022

- Spearheaded the frontend development of a real-time task management web application designed for collaborative teams. Worked closely with backend developers to create a seamless and efficient user interface that enabled users to manage tasks collaboratively.
- User Authentication: Implemented secure user authentication and authorization systems, ensuring data privacy and user account security.

ZTAD | Bamenda Northwest
Frontend Developer - Project: E-commerce Website Redesign | 11/2021 - 05/2022

• E-Commerce Website redesign: Led the frontend development efforts for a major redesign of an e-commerce website with 2,000+ monthly visitors. Collaborated closely with a cross-functional team of designers, backend developers, to deliver a seamless user experience and boost conversion rates.
• Responsive Design: Implemented a mobile-first approach, resulting in a 30% increase in mobile sales within the first quarter after launch.

Civil Salt | Bamenda Northwest
Frontend Developer - Team Lead | 03/2021 - 11/2021

• Directed a team of junior Devs in accomplishing solid desktop applications for businesses and educational sectors.
• Worked in hand with Backend Developers in the development of a banking system for online transfers.
